Dear Nubra,

The library books you sent will go a long way towards making our poorly equipped library more helpful and useful to our students. From what you saw last time you were in the library, it is far from having what we would expect of a library as a high school going to A-level. Your efforts in assisting us to make the library more useful to our students are much appreciated.

The other items (i.e. the pencils, calendars, and newsletters) will be a great source of excitement and joy for our students when they receive these and know that they have come from you.

I hope you had a nice and safe journey back home to the U.S.A. from Zimbabwe...

I hope you are in good health and enjoying your work.

Once more I wish to thank you sincerely for the generous donation to our school library and the students at Highfield. May the Good Lord bless you abundantly.

Yours Sincerely,

Forbes M. Mashoko

# Q&A

**Q: What are your goals for the future?**

**A:** Try to play basketball in college...When I was 10 or 11 my mother told me about my uncle playing college ball back in Louisiana back before I was born...His name's Forest Williams and he's an engineer and on the San Jose City Council...He might be able to help me explore the possibility of a business career...Thinking about majoring in business at a junior college, and then transferring to a four year school like one of the colleges in Atlanta—maybe Moorehouse...I hear they have a good team and maybe I can play basketball for them—but no matter what--want to get into something like real estate and probably specialize in family housing...I might want to go on for an MBA... I wanna do it all...I don't know anyone who has an MBA --I wish I did! 🙄

A Summer 2000 visit with cousins Abiyana, Nishie & Quinsella Garnett in Belize City, Belize provided the inspiration for Kajahl's painting. Photo by Nancie Benes.

**A:** Get a job doing art, I guess...My art teacher wants me to do restoration--like traveling around to museums and restoring old paintings...What I'd really like is to do is story boards for movies—That's the basic sketch of what the movie is about...I met a guy working at the boardwalk who told me that's what he was gonna do and that it pays really well...Computer graphics would be another good field to make a lot of money... I'm taking that class this semester and there's a school in Sunnyvale with a degree program in computer graphics, but I'd rather go someplace that's farther away and where there's more students---Like maybe Long Beach State...I hear it has a good art department and my grandfather lives down there. 🙄
